# ***Judge's Report***

## *Gold and Silver Laced*

I was pleased to be asked to judge the Silver and Gold Lace at the Club Show. There was quite a good entry of Gold Laced. Most were presented well, fit and of good type. The feathers are far too small, and a lot were small and pointed. I think the trouble lies with judges and exhibitors going for darker birds and because the feathers are smaller with the same amount of lacing, it makes the birds look darker, which is nowhere near the actual standard. I think, if you look in the standards book, at the beginning you will see examples of feather type and the Silver Laced feather should be about the size of a thumbnail and very rounded at the end, which emphasizes just how far from the actual standard we have deferred.

The large Silver Laced do not seem to have this problem. It is good to see we are getting more large fowl coming through as not many years ago we were lucky to have two entries.

In my opinion, the Gold Laced have been spoiled by mixing the cock breeders and the pullet breeders together, so the birds presented are no longer near the standard for Gold Laced pullet breeder, they seem to be turning out nearer cock breeder type. So, this raises the question, how do we judge them when they do not conform to the standard. Should they therefore be judged as mom-standard?

Thank you for asking me to judge the Blue Laced Wyandottes and the Buff Laced Wyandottes at the National Show, it is a great honour to be asked.

There were 38 birds judged. It was a difficult job to place the cards as so many birds had various faults, either in the markings, type or head.

I did my best on the day and hope I didn't disappoint too many exhibitors.

Finally, I would like to say a big thankyou to my steward on the day, Mr Kevin Dowrick.

All the best for the forthcoming breeding season.
