|-----------------|------|-------------------------------------------------------------------------|
| 1 <sup>st</sup> | 3557 | Type good and head and leg colour but red in tail and saddle hackle.    |
| 2 <sup>nd</sup> | 3558 | Good type. Good leg colour. Poor wing. Work in progress for both birds. |

The birds this year were a mixture good and not so good. The buff Laced bantams in males and females are coming on well. Type and lacing have improved. I hope they keep going forward.

The Blue Laced bantam males were a mixed bunch, good then complete white in flights. One had a very badly bent toe and another needed pen training. The Blue Laced pullets had good leg colour but a lot of them were rather narrow. Poor neck colour and black capped.

The large are coming on nicely in type and lacing, It's good to see the numbers going up in all the colours and more people breeding and showing them Pleased to say no birds with 'visitors'. All clean and no split wings. A couple of weak ones, that's all.

All the best to everyone for 2020. I hope you all have a successful showing and breeding year.
